

## Searching for and Viewing an Online Video Clip

In this exercise you will use the Advanced Search function to locate and play an Online Video Clip

1. Select the Advance Search link, located next to the Search button at the upper right of the Thinkport Site.

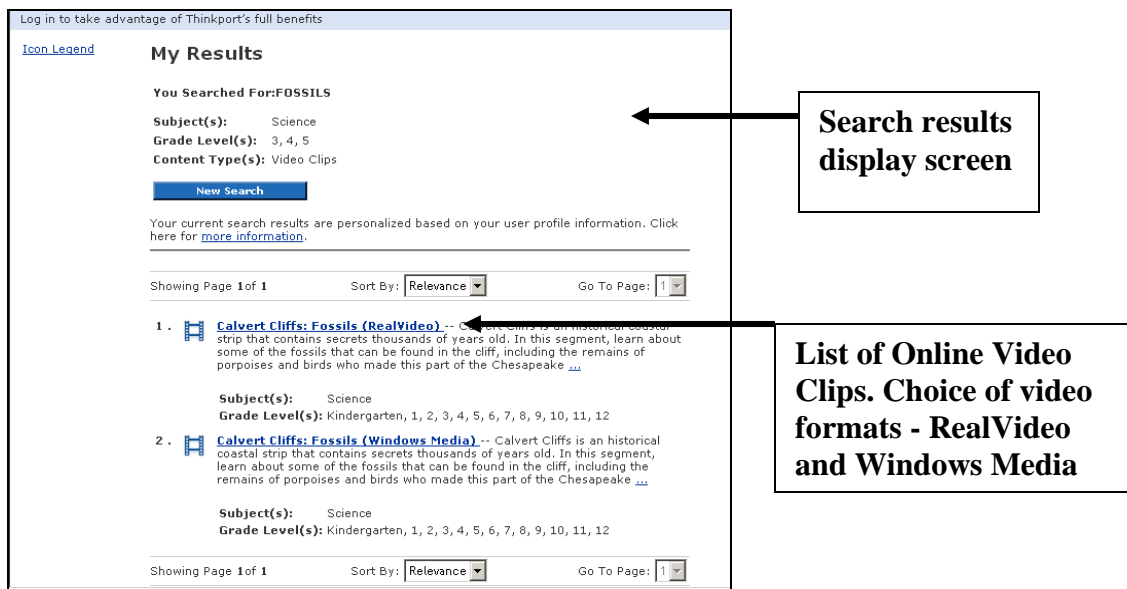

2. Complete the Advanced Search form using choices from the chart below.

Grades	Math Keywords	Science Keywords	Social Studies Keywords	Language Arts Keywords
K – 2	Patterns	Life cycle	Settlers	Caldecott
3 - 5	Probability	Fossils	Maryland History	Culture
6 – 8	Graphing	Adaptations	Biography	Author
9 -12	Sample Population	Disease	Political	Poetry

- 2.a. Choose a keyword from the above chart and enter it into the “**with ALL the words**” text box.
- 2.b. Under **Select Subjects**, select the check box that corresponds to the keyword you entered from the chart above. *For example, if you chose Fossils as your keyword then select Science as the Subject.*
- 2.c. Under **Select Grade Levels**, select the check the box that corresponds to the keyword you entered from the chart above.
- 2.d. Under **Select Content Type**, select the **video clips** check box

3. Select the **Thinkport Search** button

The screenshot shows the Thinkport search results page for the keyword "FOSSILS". The page includes a "My Results" section with search filters: Subject(s): Science, Grade Level(s): 3, 4, 5, and Content Type(s): Video Clips. A "New Search" button is present. Below the filters, there is a note about personalized results and a "more information" link. The results are sorted by "Relevance" and show two items:

1. **Calvert Cliffs: Fossils (RealVideo)** -- Calvert Cliffs is an historical coastal strip that contains secrets thousands of years old. In this segment, learn about some of the fossils that can be found in the cliff, including the remains of porpoises and birds who made this part of the Chesapeake ...
2. **Calvert Cliffs: Fossils (Windows Media)** -- Calvert Cliffs is an historical coastal strip that contains secrets thousands of years old. In this segment, learn about some of the fossils that can be found in the cliff, including the remains of porpoises and birds who made this part of the Chesapeake ...

Each result includes its subject (Science) and grade levels (Kindergarten through 12). The page also shows pagination controls at the bottom.

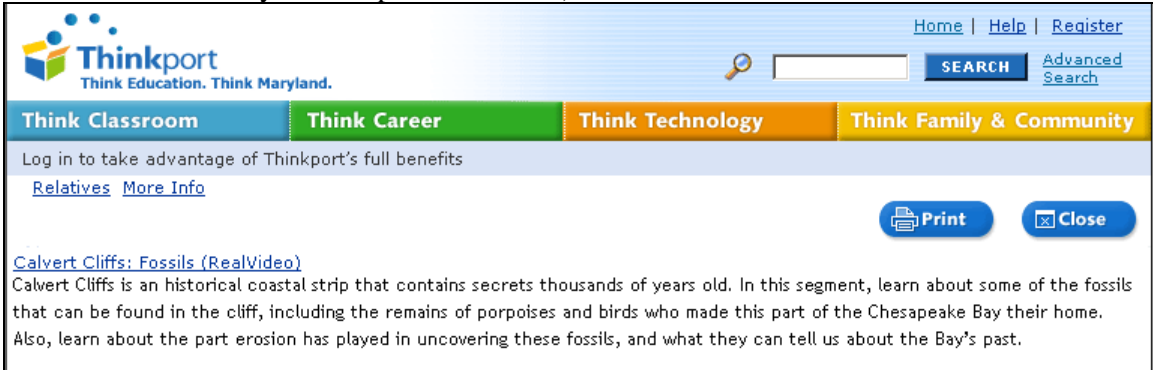

**Search results display screen**

**List of Online Video Clips. Choice of video formats - RealVideo and Windows Media**

4. Select a video clip

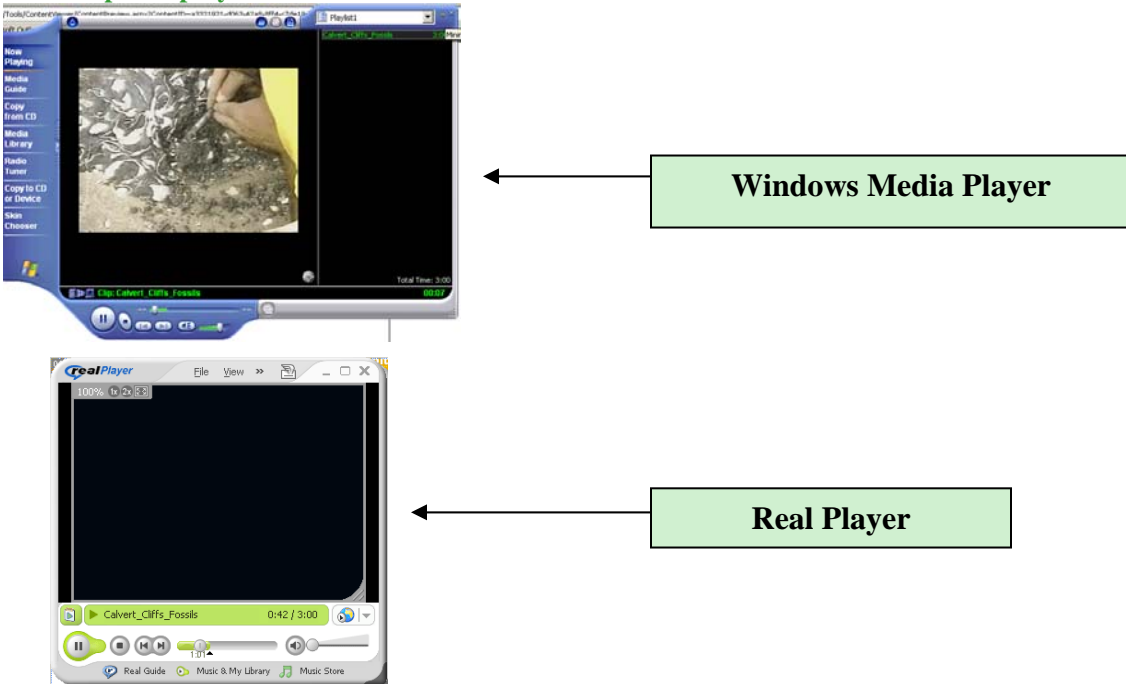

**Note:** Video Clips are available in both Windows Media Player and RealVideo formats.

The clip you selected displays on the Thinkport Content Preview Page (pop-up blockers must be disabled on your computer to access)

5. Select the title to view the video.

**Windows Media Player or Real Player, will launch, depending on the file type, and the video clip will play.**

**Note:** Videos may take a few minutes to download so you may want to download the clip before class.
